

COMMUNITY-LED RESPONSES ARE KEY TO REACH PEOPLE

Increased recognition of community-led HIV responses thanks to an agreed definition and guidance

Stronger capacity of community-led organizations for greater impact

Innovations to expand key population-led HIV service

Over 80 countries supported to expand community-led HIV responses, including advocacy, service delivery and monitoring

In **west and central Africa**, 150 civil society organizations gained skills in size estimation and HIV programming

In **eastern Europe and central Asia**, over 7500 children and adolescents living with HIV in 7 countries accessed HIV information and services through community organizations

PROMOTING THE VOICE AND LEADERSHIP OF COMMUNITIES FOR A PEOPLE-CENTRED AND RIGHTS-BASED HIV RESPONSE

Empowered people living with HIV, women and girls, young people and key populations, including for meaningful dialogue with governments and other key stakeholders

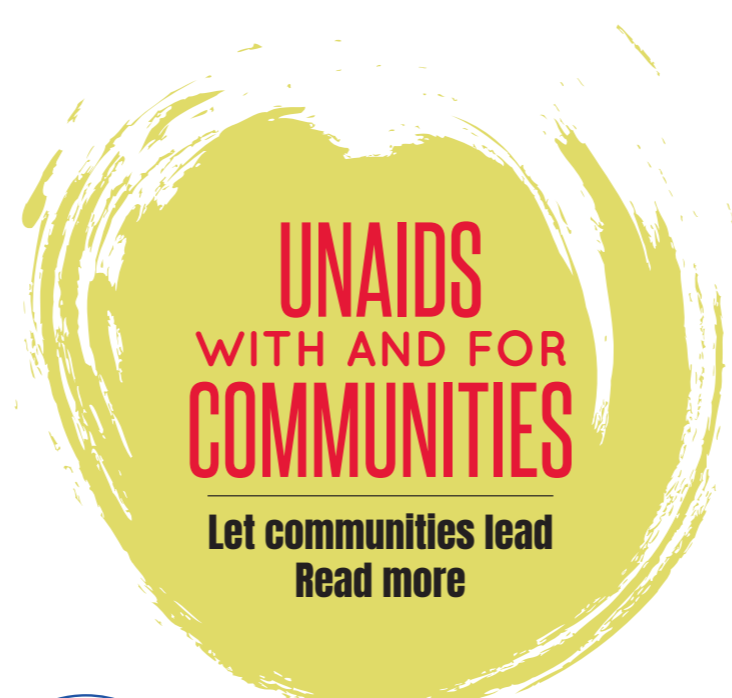

Advocated for more protective HIV-related national laws and policies
Prevented stigma and discrimination, gender-based violence, and monitored rights violations

30 countries supported gender-responsive HIV services and advocacy, promoting women's meaningful participation and addressing gender-based violence and discrimination

Promotion of the rights of migrants, refugees and displaced populations, including from the LGBTIQ+ communities, to access HIV services in Latin and central America

In **eastern and southern Africa**, 10 countries implemented evidence-based interventions to transform unequal gender norms, including harmful masculinities

In **Asia and the Pacific**, empowered key populations, including transgender persons, advocate for their rights and to address barriers that prevent them from accessing health-care and social protection services

COMMUNITY-LED MONITORING AND RESEARCH FOR BETTER PROGRAMMES TO CLOSE GAPS

Expansion and use of community-led monitoring

Community-led research and advocacy to tackle stigma

Fostered knowledge sharing, developed best practices and tools: Community-led monitoring in action: **Emerging evidence and good practice**, and community-led monitoring progression matrix

Supported community-led monitoring in 75 countries

13 countries catalyzed improvements in HIV responses for young people by using PACT's #UPROOT scorecard

People living with HIV Stigma Index reports used to inform legal and policy change and programmes (in over 30 countries) and resource mobilization

INVESTING IN COMMUNITIES FOR EFFECTIVE IMPACT

Guidance and data on resource tracking, costing and sustainable financing for community-led responses

Promoted community-engagement to optimize resource allocation

New resource tracking and costing guideline for community-led responses

Promoted social contracting to sustain community-led responses, including knowledge sharing and national guidelines in 8 countries

32 countries used costed plans to expand and institutionalize youth-led HIV responses

Increased funding for community-led HIV response in Global Fund grants
