Appendix I Methodology

1.1 Introduction

This document describes the MOPAN Common Approach methodology for the 2012 assessment, those who participated in the study, and the data collection and analysis process for this year.

Background

The Multilateral Organisation Performance Assessment Network (MOPAN) is a network of 16 donor countries¹ with a common interest in assessing the organisational effectiveness of the multilateral organisations they fund.

The MOPAN Common Approach methodology was developed to address the recognised need for a common comprehensive system to assess multilateral organisations. Its aim is to respond to the information needs of donors by producing information that would not be available otherwise about how an organisation is doing in areas that donors consider important.

The Common Approach aims to reduce the need for other assessment approaches by bilateral donors. It was derived from existing bilateral assessment tools and complements and draws on other assessment processes for development organisations – such as the bi-annual Survey on Monitoring the Paris Declaration on Aid Effectiveness and annual reports of the Common Performance Assessment System (COMPAS) published by the multilateral development banks.

Purpose

MOPAN assessments are intended to:

- Generate relevant, credible and robust information MOPAN members can use to meet their domestic accountability requirements and fulfil their responsibilities and obligations as bilateral donors.
- Provide an evidence base for MOPAN members, multilateral organisations and direct partners to discuss organisational effectiveness and, in doing so, build better understanding and improve organisational effectiveness and learning over time.
- Support dialogue between MOPAN members, multilateral organisations and their partners, with a specific focus on improving organisational effectiveness over time, both at country and headquarters level.

The MOPAN Common Approach does not compare multilateral organisations to one another as their mandates and structures vary too much in nature and scope. MOPAN assessments are repeated at intervals and therefore can help determine whether a multilateral organisation's performance is perceived to have changed over time in the areas examined by the MOPAN Common Approach. It is important to note, however, that as MOPAN continues to improve the methodology for the Common Approach from year to year, comparisons of this year's results with those of previous years should be handled cautiously.

Evolution

The MOPAN Common Approach methodology evolves in response to what is learned from year to year, and to accommodate multilateral organisations with different mandates.

¹ MOPAN members in 2012: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Ireland, the Netherlands, Norway, Republic of Korea, Spain, Sweden, Switzerland, and the United Kingdom.

The MOPAN methodology was initially designed to assess the organisational effectiveness of multilateral organisations, which MOPAN defines as the extent to which a multilateral organisation is organised to contribute to development results in the countries where it operates. Given this focus, MOPAN assessments emphasised the organisational practices, systems, and behaviours that MOPAN believes are important for multilateral organisations in managing for development results.

In 2011, MOPAN began exploring options for expanding its assessment framework to include a review of the results achieved by multilateral organisations, including collaboration with the OECD DAC Evaluation Network. In 2012, MOPAN tested an approach to assessing the key results of multilateral organisations.

2. MOPAN Common Approach Design

2.1 Evolution of MOPAN Assessment Framework

MOPAN continues to refine its assessment framework. In 2009, the MOPAN Common Approach replaced the Annual MOPAN Survey, which had been conducted since 2003.

The MOPAN Common Approach is broader and deeper than the previous surveys and includes the following components:

- Expanded survey – The MOPAN survey now brings in the views of direct partners or clients of multilateral organisations and those of donors, that is, MOPAN members at both headquarters and country level.
- Document review – Since 2010, survey data are complemented by a review of documents prepared by the multilateral organisations being assessed and other sources.
- Interviews – In 2012, MOPAN will complement survey data and document review with consultations and interviews at the headquarters of multilateral organisations assessed.

In 2012 MOPAN tested a new component to assess the results of multilateral organisations.²

2.2 Performance Areas and Indicators

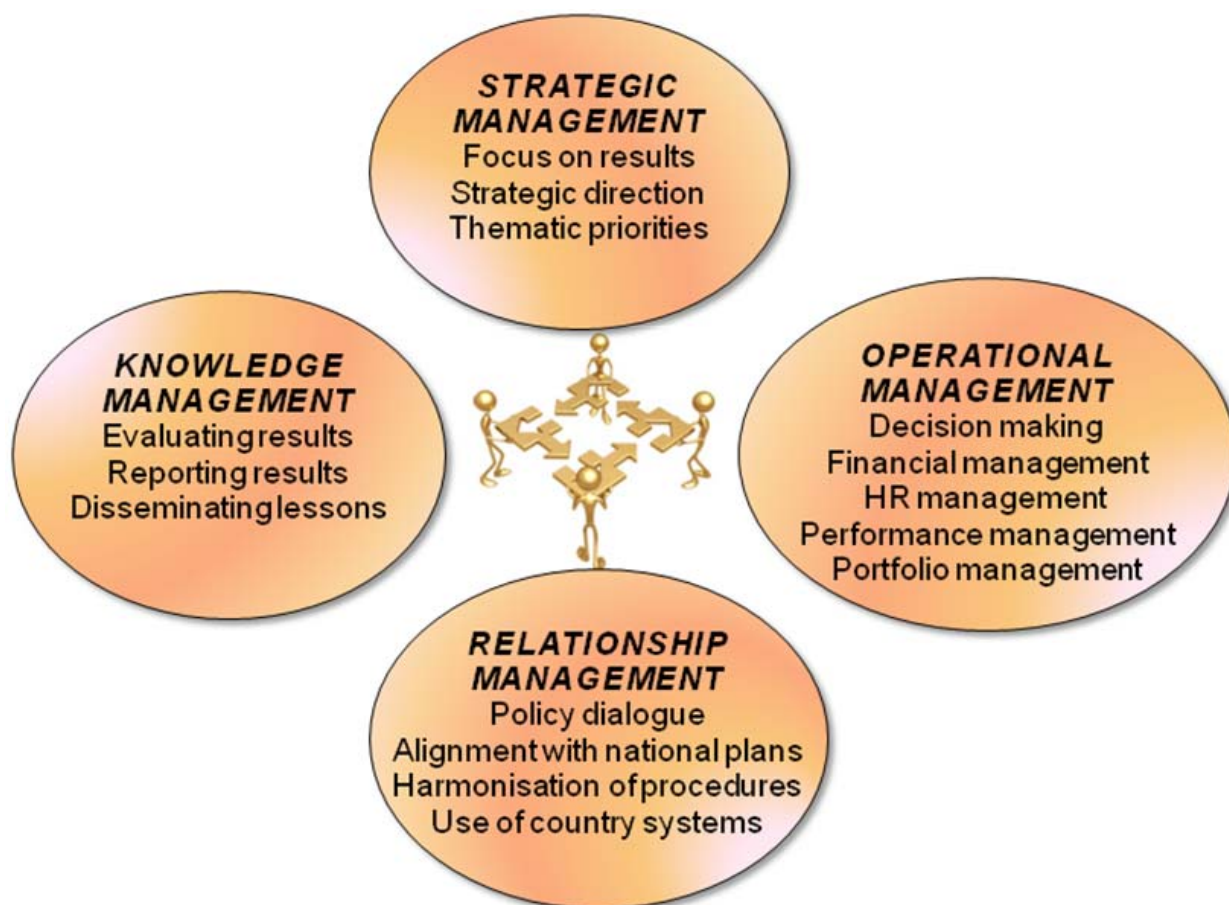

The MOPAN Common Approach examines organisational systems, practices, and behaviours that MOPAN believes are important for aid effectiveness and that are likely to contribute to results at the country level. The Common Approach framework groups these organisational capacities in four areas of performance:

- *Strategic management*: developing and following strategies that reflect good practices in managing for development results;
- *Operational management*: managing operations in a way that is performance-oriented, thus ensuring organisational accountability for resources and results;
- *Relationship management*: engaging in relationships with direct partners/clients and other donors at the country level in ways that contribute to aid effectiveness and that are aligned with the principles of the Paris Declaration; and
- *Knowledge management*: developing feedback and reporting mechanisms and learning strategies that facilitate the sharing of knowledge and performance information.

While these definitions and performance areas are broadly applicable to a range of types of multilateral organisations (including those involved in humanitarian and normative work), the dimensions explored in the MOPAN Common Approach are adjusted as necessary to reflect the mandates of each organisation assessed.

² This component was tested in 2012 with the African Development Bank, UNICEF, UNDP, and the World Bank.

Dimensions of organisational effectiveness in the MOPAN Common Approach

Key Performance Indicators and Micro-Indicators

Within each performance area, organisational effectiveness is described using several key performance indicators (KPIs) that are then measured in a series of micro-indicators (MIs).

The 2012 assessment draws on indicators that MOPAN has developed since 2007 (see sidebar) and tailors them, as required, for each of the organisations being assessed.

Evolution of MOPAN Indicators

2007: In an initial mapping exercise of existing bilateral donor assessment tools, MOPAN identified 250 indicators, many of which were overlapping.

2008: MOPAN reduced these to 35 key performance indicators (KPI) and 120 micro-indicators (MI)

2009 – 2011: MOPAN assessments included between 18 and 21 key performance indicators and between 60 and 75 micro-indicators, depending on the nature of the organisation and its mandate.

2.3 Multilateral Organisation Selection

Each year MOPAN selects multilateral organisations for assessment on the basis of the following criteria:

- Perceived importance and interest to all MOPAN members
- Medium-term strategic planning (or equivalent) and replenishment cycles – with a view to assessing organisations prior to the planning process or the start of the replenishment negotiation process
- A mix of international financial institutions (IFI); UN funds, programmes, and specialised agencies; and humanitarian organisations.

On the basis of these criteria MOPAN aims to assess multilateral organisations on a 3-5 year cycle.

In 2012, MOPAN assessed six organisations: the African Development Bank (AfDB), the GAVI Alliance (formerly the Global Alliance for Vaccines and Immunisation), the Joint United Nations Programme on HIV/AIDS (UNAIDS), the United Nations Development Programme (UNDP), the United Nations Children’s Fund (UNICEF), and the World Bank. Four of these organisations were assessed by MOPAN in 2009 (AfDB, UNDP, UNICEF, and the World Bank).

2.4 Country Selection

Each year countries are selected for the MOPAN assessment based on the following criteria:

- multilateral organisation presence in-country
- presence and availability of MOPAN members
- no recent inclusion in the survey
- the need for geographical spread
- a mix of low income and middle income countries (middle income countries being subdivided into lower middle and upper middle).

The assessment in 2012 was conducted in Cambodia, Democratic Republic of Congo, Ghana, Honduras, Philippines, Morocco, Niger, Nigeria, and Zimbabwe.

3. Survey

3.1 Overview

The MOPAN Common Approach gathers stakeholder perception data through a survey of MOPAN members (at headquarters and in-country) and other key stakeholders of the multilateral organisations under review, including direct partners or clients, peer organisations, and host or recipient government representatives. The number and type of respondent groups may vary for each organisation and additional respondent types may be included.

The main instrument for conducting the survey is an online survey. Respondents are able to complete the web-based survey in English, French, or Spanish.³ When it is not possible for respondents to complete the online survey, off-line methods are used. Respondents may fill out a paper-based survey, complete an electronic version of the survey in Microsoft Word that is sent by email, or participate in a structured interview either in person or by telephone.

In order to ensure confidentiality, consultants (independent of MOPAN) manage the survey process and carry out the interviews.

³ A paper version of the questionnaire is translated into local languages, as required.

Respondent Types

To gather diverse perspectives on the multilateral organisations being assessed, MOPAN generally seeks the perceptions of the following primary respondent groups:

- **Donor Headquarters Oversight (HQ):** Professional staff, working for a MOPAN donor government, who share responsibility for overseeing / observing a multilateral organisation at the institutional level. These respondents may be based at the permanent mission of the multilateral organisation or in the donor capital.
- **Donor Country Office Oversight (CO):** Individuals who work for a MOPAN donor government and are in a position that shares responsibility for overseeing/observing a multilateral organisation at the country level.
- **Direct Partner/Client (DP):**⁴ Typically, individuals who work for a national partner organisation (government or civil society) in a developing country. Respondents are usually professional staff from organisations that receive some sort of direct transfer from the multilateral organisation or that have direct interaction with it at country level (this could take the form of financial assistance, technical assistance, policy advice, equipment, supplies, etc.). The definition of “direct partner” varies according to the context of each organisation assessed. In some cases, direct partners include staff members from international agencies that are implementing projects in conjunction with the multilateral organisation being reviewed.

For some organisations, other respondent categories are also used, such as peer organisations, co-sponsoring agencies, or recipient/host governments.

3.2 Sampling and Response Rates

Sampling

The Common Approach uses a purposive sampling method called ‘expert sampling’ in which potential respondents are identified by either MOPAN members or the multilateral organisations as having the basis for an expert opinion on the organisation being assessed.

The identification process, which involves all MOPAN members in collaboration with the multilateral organisations assessed, results in a list of the population (all potential respondents) for each of the multilateral organisations.

Individuals are invited to complete the survey for each organisation for which they have functional responsibility and sufficient knowledge.⁵ This is confirmed through a screening question that asks respondents to indicate their level of familiarity with the multilateral organisation being assessed, using a scale from 1 (not at all familiar) to 5 (very familiar). Respondents can continue the survey only if they indicate they are familiar with the multilateral organisation (i.e., a rating of 2, 3, 4, or 5).

The sample size is taken into account when deciding how to present survey data at the country level. If a threshold of respondents is not met, data summaries exclude the respondent group.

Response rate

MOPAN aims to achieve a 70 per cent response rate from donors at headquarters and a 50 per cent response rate from all other target groups, which is considered acceptable for a survey of

⁴ In the context of IFIs, these are referred to as “clients” and some organisations refer simply to “partners.”

⁵ Each individual respondent is provided with a unique link that reflects the respondent type and the multilateral organisation(s) they have been assigned to. Some individuals, particularly MOPAN members, may complete surveys on more than one organisation.

respondents who need to have detailed knowledge about the organisation in order to participate.

During the survey period, response rates are monitored regularly. Respondents who do not access the survey or who do not complete it receive reminders from a range of sources:

- Email reminders from the survey consultant
- MOPAN country office and headquarter respondents will receive reminders from their MOPAN Focal Point
- Direct partners will receive reminders from the local survey consultant.

Responses provided through all off-line methods (including paper-based surveys, surveys in MS Word provided by email, and surveys completed through structured interviews) are entered into the online instrument using a separate link to the survey instrument. Data for online and off-line responses are merged only after quality control measures such as confirming correct type of stakeholder, country, etc are performed.

3.3 Survey Instrument

Survey Customisation

The survey instrument draws on the existing set of indicators and is customised for each multilateral organisation assessed, to reflect both the type of organisation and the types of respondents. This is done in consultation with the multilateral organisations being assessed and other individuals (MOPAN members and external resources) who are familiar with these organisations.

A core set of questions is developed for all respondents and additional questions are designed for specific respondent groups (reflecting their functional responsibility or relationship with the organisations). For example, questions relating to corporate issues, such as reporting to the Executive Board, are asked only of donors at headquarters. Questions on country-specific issues, such as the use of country systems, are asked only of donors in-country and clients/direct partners of multilateral organisations. Some questions are adjusted to reflect the nature of the multilateral organisation (e.g., cross-cutting thematic priorities).

Survey Instrument

At the beginning of the survey, respondents are invited to assess the organisational effectiveness of the multilateral organisation and are also asked two open-ended questions on their views of the organisation’s overall strengths and areas for improvement. In addition, respondents are invited to provide comments on each of the four dimensions of effectiveness.

The main part of the survey consists of a series of closed-ended questions on the micro-indicators for each key performance indicator (KPI). Respondents are presented with a statement describing an organisational practice, system, or behaviour and asked to rate the organisation’s performance on a scale of ‘very weak’ to ‘very strong’ as shown below. There is also a ‘don’t know’ option.

Score	Rating	Definition
1	Very Weak	The multilateral organisation does not have this system in place and this is a source of concern
2	Weak	The multilateral organisation has this system but there are important deficiencies.
3	Inadequate	The multilateral organisation’s system in this area has deficiencies that make it less than acceptable.

Score	Rating	Definition
4	Adequate	The multilateral organisation's system is acceptable in this area.
5	Strong	The multilateral organisation's system is more than acceptable, yet without being "best practice" in this area.
6	Very Strong	The multilateral organisation's system is "best practice" in this area.

3.4 Survey Data Analysis

SPSS and Stata statistical software are used to analyse survey responses.

First level data analysis

First level survey data analysis includes calculations of mean scores, medians, standard deviations, frequencies (including analysis of 'don't know' and missing responses), as well as content analysis of open-ended questions.

Frequency Calculation: Frequencies are calculated on both a weighted and un-weighted basis (see below for further explanation of our approach to weighting). Frequencies are calculated based on answers to survey questions corresponding to micro-indicators. In both sets of calculations, 'don't know' responses and missing responses are calculated as a part of the overall total frequencies. In addition to raw frequencies, all frequencies are translated into percentages for ease of interpretation.

Mean Score Calculation: Scores are calculated based on answers to survey questions corresponding to micro-indicators. Mean scores are calculated on a weighted basis only, based on the number of valid responses to each question. Valid responses exclude 'don't know' responses and missing data (i.e., where respondents decide not to answer, or do not conform to required criteria such as location of work).

Mean scores are calculated for each survey question (micro-indicator) and then for each key performance indicator (KPI) by aggregating the scores for the micro-indicators (MI) within that KPI. Equal weight is applied to each MI. For example, a KPI consisting of three micro-indicators that individually score 2, 3, and 4 will have a KPI mean of 3. In cases where multiple survey questions are needed to develop a concept, micro-indicators are composed of multiple sub-indicators. In such cases, the mean score of the sub-indicators is used to calculate the score for that particular MI.

A weighting scheme is applied to ensure that no single respondent group or country is under-represented in the analysis. The weighting is intended to correct for discrepancies/variation in:

- The number of individuals in each respondent group⁶
- The number of countries where the survey took place
- The numbers of donors in-country, direct partners, and other respondent groups within each country where the survey took place.⁷

⁶ To account for the different numbers of respondents in each respondent group, individual weights are applied to each group.

⁷ Weights for these groups are determined by the total number of respondents from each group who answer in their country, relative to the total number answering in other countries. Thus, a respondent in a country with a lower number of respondents carries a higher individual weight than the equivalent respondent from a country with a higher number of respondents.

A weight is calculated for each multilateral organisation using the following equation:

$$W = \frac{P}{RCG}$$

Where:

- W = weight factor for a given respondent group set for the multilateral organisation
- P = total number of respondents for the multilateral organisation
- R = number of respondent groups in the survey sample for the multilateral organisation
- C = number of countries in the survey sample (per respondent group)
- G = number of respondents in a particular country/respondent group set for the multilateral organisation

Weighted figures are carefully reviewed and analysed before inclusion in the multilateral organisation reports.

Converting Individual Scores to Group Ratings

A mean score is calculated for each respondent group (e.g., donors at HQ). Since mean scores are not necessarily whole numbers (from 1 to 6) MOPAN assigns numerical ranges and descriptive ratings for each range (from very weak to very strong) as shown below.

Range of the mean scores	Rating
1 to 1.49	Very Weak
1.50 to 2.49	Weak
2.50 to 3.49	Inadequate
3.50 to 4.49	Adequate
4.50 to 5.49	Strong
5.50 to 6.00	Very Strong

The ranges are presented to two decimal places, which is simply the result of a mathematical transformation and should not be interpreted as representing a high degree of precision. The ratings applied to the various KPIs should be viewed as indicative judgments rather than precise measurements.

Second level analysis

Second level analysis examines differences in the responses among categories of respondents and other variables, as relevant for each organisation. Appropriate methods of statistical analysis are applied, including analysis of variance (ANOVA) for differences among multiple groups, t-tests for comparisons of differences between pairs of groups, and non-parametric methods where numbers of respondents required such an approach (e.g. to address assumptions of non-normality where they exist). The normal convention for statistical significance is adopted ($p \leq 0.05$) and these are reported where significant differences are found.

Given the small size of the samples, particularly for some respondent groups, the comparisons across respondent groups are provided as indicative information that can be used as a basis for discussion.

4. Document Review

4.1 Overview

Through an examination of publicly available documents,⁸ the MOPAN document review explores evidence that multilateral organisations have the systems that MOPAN considers to be important factors in an organisation's effectiveness.

The document review considers three types of documents:

- Multilateral organisation documents relevant to the assessment of the MOPAN micro-indicators. The organisations help to identify these documents.
- Organisational reviews or assessments (external or internal) about the organisation's performance on the dimensions of the MOPAN framework (strategic management, operational management, relationship management, and knowledge management). These studies are either found on the organisation's web site or are provided by the organisation.
- External assessments such as the Survey on Monitoring the Paris Declaration (2011), the Common Performance Assessment (COMPAS) report (2010), and previous MOPAN surveys.⁹

4.2 Document Sampling

The multilateral organisations selected for review represent a wide variety of organisational structures, processes, and practices – which makes it challenging to create a generic sampling strategy. However, the collection of documents follows a number of overall principles to ensure consistency and focus the sampling process.

All documents, regardless of type or level within the organisation, should be approved by the relevant authority (e.g., organisation-wide documents are usually approved by the multilateral organisation's Executive Management or Board).¹⁰

All documents (including policies, guidelines, strategies, thematic documents and web site information) are selected at least in part based on the requirements noted below.

- Policies or guidelines, at any level within the multilateral organisation, are selected only if they are in force as of the year of assessment.
- Strategies, regardless of level within the multilateral organisation, are selected only if they are being implemented within the year of assessment.
- Thematic documents, including strategies, plans and reports, regardless of the level within the multilateral organisation, are selected based on a principle of reviewing a mix of thematic areas.
- Any information presented on the multilateral organisation's web site (i.e., the text from a page on this site, not a downloadable document available on the site) is retrieved within the year of assessment, and is assumed to be current unless the web page itself states otherwise.

⁸ Documents are considered to be "publicly available" if they are on the organisation's web site or if the organisation is able to provide them upon request for the purpose of assessing the micro-indicators.

⁹ If data from these sources are not available for the multilateral organisations participating in this year's survey, either an alternate approach is developed or the micro-indicators are not assessed.

¹⁰ This is intended to ensure that documents reviewed are final documents (rather than drafts) and that they are providing guidance for organisational behaviour.

- All documents (except for policies, guidelines and strategies) should be published within the following timelines:
 - Project/programme level documents: the current or previous year
 - Country, regional, or organisation-wide documents: the past three years inclusive of the year of assessment
- When specific MIs require a sample of sector strategies, country strategies, or project level documentation, a specific sampling approach is developed and tailored for each multilateral organisation.

4.3 Document Collection

The collection of documents follows the general steps outlined below, although it is not a linear process:

- Initial document research on the web site of the multilateral organisation
- Collection of COMPAS and Paris Declaration Survey Data
- Consultation with the multilateral organisation, who review and refine the initial data set (through the MOPAN Institutional Lead)
- Finalisation of document list.

Once the document list is finalised and the document review has commenced, further documentation needed to fill any gaps in information for certain indicators is requested from the multilateral organisation. If the documents obtained from the third request do not contain the information needed, the consultant team makes the assessment based on the information available.

Other external assessments

As noted above, the document review includes a review of other external assessments.

Common Performance Assessment System (COMPAS) report, 2009 and 2010

COMPAS provides a framework through which the multilateral development banks (MDBs) can track their capacities to manage for development results (MfDR). The annual COMPAS report provides data in four categories (Country Strategies, Managing for Development Results through the Project Cycle, Corporate Results Reporting, Private Sector Development and Operations) that are relevant to the MDBs' implementation of the MfDR agenda. The data are gathered by internal management units in the MDBs, generally those that are supporting the implementation of MfDR. For the IFIs, MOPAN focuses primarily on the following indicators from the COMPAS report: B. Managing for Development Results through the Project Cycle

- Implementation performance
 - B. 8. Number and percentage of projects that were unsatisfactory in FY08 and that became satisfactory in FY09.
- Project completion reporting and evaluation
 - B. 11. Number of projects independently reviewed ex post during FY09, as a percentage of the average number of projects completed annually during the last 5 years.

Survey on Monitoring the Paris Declaration, 2008 and 2011

The two most recent monitoring surveys (2008 and 2011), managed by the OECD, highlight areas in which countries and organisations may be falling short in reaching the targets established by the Paris Declaration. Since a number of the MOPAN indicators are based on the Paris Declaration indicators, the assessment looks at the data provided in Appendix C of

the monitoring survey report, entitled “Donor Data”¹¹, for the following indicators, when applicable:

- Indicator 3: Aid flows aligned on national procedures
- Indicator 4: Strengthen capacity by co-ordinated support
- Indicator 5 a and b. Use of country public financial systems and use of country procurement systems
- Indicator 6: Strengthen capacity by avoiding parallel implementation structures
- Indicator 7: Aid is more predictable
- Indicator 9: Use of common arrangements or procedures
- Indicator 10a: Joint missions

The OECD survey reports data for the United Nations as a whole, thus MOPAN relies on UN organisations to provide their data as input for these indicators. Other data sources will also be consulted to complement the OECD survey reports.

4.4 Document Analysis

The multilateral organisations are assessed on relevant micro-indicators in the Common Approach document review framework.¹² The document review ratings build on the definitions and scale used in the survey, as described in section 3.3 above.¹³ The document review ratings range from 1 (Very Weak) to 6 (Very Strong).

For most micro-indicators, five criteria are established which, taken together, are considered to represent the best practice in that topic area. Each criterion is designed as a yes/no alternative and each “yes” answer counts as one point in the rating. Ratings are arrived at by totalling the number of criteria met, taking into account all the evidence in the assessment, and the Assessment Team’s judgment.

Document review criteria and rating

Number of criteria met	Descriptors	Definitions
No criteria met (or required document(s) do not exist)	Very Weak	The multilateral organisation does not have this system in place and this is a source of concern/ or the multilateral organisation has no document that provides evidence of such a system being in place.
One criterion met	Weak	The multilateral organisation has this system but there are important deficiencies.
Two criteria met	Inadequate	The multilateral organisation’s system in this area has deficiencies that make it less than acceptable.
Three criteria met	Adequate	The multilateral organisation’s system is acceptable in this area.

¹¹ In general, the assessment draws on the data from the “Average Country Ratio – All Countries”, unless it is not available.

¹² Not all MOPAN micro-indicators are identified for document review.

¹³ For document review, however, the definition of “Very Weak” is expanded to mean that “the multilateral organisation does not have this system in place and this is a source of concern / or the organisation has no document that can provide evidence of such a system being in place.”

Number of criteria met	Descriptors	Definitions
Four criteria met	Strong	The multilateral organisation's system is more than acceptable yet without being "best practice" in this area.
All five criteria met	Very Strong	The multilateral organisation's system is "best practice" in this area.

Some micro-indicators, such as those using Paris Declaration Survey data as the primary data source,¹⁴ follow a different rating method. In these cases, ratings are established on a case-by-case basis according to three descriptive criteria – 'inadequate', 'adequate' and 'strong'.

Ratings for key performance indicators (KPIs) are based solely on the ratings for the component micro-indicators in each KPI. Each KPI rating is calculated by taking the arithmetic mean of all micro-indicator ratings in that KPI rounded to the nearest whole number. This number is given the appropriate descriptor. In cases where the micro-indicator ratings for one key performance indicator are highly divergent (i.e., if there are two micro-indicators, and one is rated as "very weak" while the other is rated as "very strong"), this is noted in the narrative of the report.

Content Analysis

Documents are reviewed by content analysis based on the themes of the micro-indicators. Specific criteria for assessing the content of documents have been developed, based on existing standards and guidelines for each of the indicator areas (for example, any UNEG or OECD-DAC guidelines), on MOPAN identification of key aspects to consider, and on the input of subject-matter specialists.

The analysis includes an examination of four broad areas:

- **Quality:** Documents are assessed in terms of their content, and in particular for the presence or absence of particular items or characteristics noted in standards as best practice.
- **Use:** While difficult to assess by document review, some proxy indicators for the use or implementation of a document are examined, such as evidence from budget documents that a certain policy or priority area is being financed, or evidence from evaluations that show implementation of a policy or priority area.
- **Consistency:** Where possible, several documents of the same type are examined (such as country strategies in different countries) to assess the extent to which criteria are met consistently across the organisation.
- **Improvement over time:** In some cases, documents are examined over several years to assess the extent to which progress can be seen over time.

Documents are also used to aid in the understanding of the context in which the multilateral organisations work.

¹⁴ Paris Declaration Survey data will be the primary, but not the only, source for those MIs that are based on Paris Declaration indicators.

5. Interviews

As of 2012, interviews are conducted at the headquarters of multilateral organisations with individuals who are knowledgeable in areas that relate to the MOPAN assessment.

Interviewees are asked to provide knowledge, insight, and contextual information that could assist the MOPAN Assessment Team in analysing document review data, and to identify other relevant documents for the Assessment Team to consider. This helps ensure that the Assessment Team has all the appropriate and necessary documents, enhances the Team's ability to triangulate data from various sources, and assists the Assessment Team in the analysis of the key performance indicators by providing contextual information.

Interviews are conducted with a small number of staff who work in the primary units that relate to areas of the MOPAN assessment (e.g., strategy and planning, human resources, RBM, and evaluation). Interviewees are identified by the multilateral organisation in conjunction with the Assessment Team and MOPAN.

Interviews are semi-structured but flexible, allowing new questions to be brought up during the interview as a result of what the interviewee says. This type of interview does not follow a tightly prescribed questionnaire, but does require prior preparation of the key interview themes. The interview themes and questions are shaped by the MOPAN assessment framework and are tailored for each of the respondents according to his/her functional responsibility. An interview guide is prepared and interviewees are advised of the content areas beforehand.

Interviews are intended to provide several benefits to the MOPAN assessment. First, they provide the multilateral organisation with a better understanding of the types of documented data that are required for the MOPAN assessment so that they can fill in any gaps in the documentation required for the document review. Second, they provide the MOPAN Assessment Team an opportunity to better understand the multilateral organisation's practices and systems.

Data gathered during interviews is used as background information on the various areas being assessed – specifically, to understand the context in which the agency is working, as well as how decisions are made. In the event that survey data presents a picture that is very different from the assessment made in the document review, information from the interviews can help clarify how the multilateral organisation approached a certain issue.

The interviews are conducted after the Assessment Team has conducted a preliminary review of documents and are scheduled primarily during the months of April and May. If the multilateral organisation and MOPAN agree, the interviews are conducted in person during visits to the headquarters of the multilateral organisations. Alternatively, interviews are carried out by telephone or via video-conference.

6. Basis for Judgment

From 2003 to 2009, the basis for judgment in MOPAN assessments was the perceptions of survey respondents. With the introduction of the document review in 2010 and interviews in 2012, judgments now draw on a variety of sources that can be compared and triangulated.

- **Survey:** Survey respondent perceptions are still an important component of the judgments on multilateral organisation performance and now include a broader range of stakeholders.
- **Document Review:** The document review process is guided by specific criteria for assessing the content of documents in relation to the micro-indicators. These criteria draw on existing standards where available (e.g., OECD-DAC, UNEG or other standards) and are adapted to the needs of the MOPAN Common Approach.

- **Interviews:** The interviews are used to triangulate data with the other two data sources. The MOPAN Assessment Team explores the convergence (or non-convergence) of the data, and when there is no convergence the team relies on expert judgment.

To the extent possible, the assessment standards and criteria are tailored to reflect the nature and operating environment of the multilateral organisations under review.

Triangulation

Triangulation is the process of using multiple data sources, data collection methods, and/or theories to validate research findings. Triangulation helps eliminate bias, and detect errors or anomalies.¹⁵ In the Common Approach, triangulation is done in a number of ways:

- Document review ratings are presented separately from survey results in order to illustrate convergence with or divergence from them.
- Additional assessments of the organisations are reviewed to help to validate or question the findings.
- Interviews are conducted to provide additional data and contextual information.
- The findings are widely vetted within the MOPAN network and revised based on feedback from members.
- The reports are shared with the multilateral organisations and their review constitutes the final stage of the data collection process.

The MOPAN reports gain trustworthiness through the multiple reviews and validation processes that are carried out by members of the network and by the multilateral organisations themselves.

7. Reporting

7.1 Institutional Reports

Individual institutional reports are produced for the multilateral organisations assessed. Survey results are reported using means and frequencies. At the organisation-wide level, mean scores are predominantly used to report results from micro-indicators.

The results of the document review are presented alongside the survey results and discussed in light of the perception-based scores and interviews, in order to further substantiate and contextualise the overall findings.

7.2 Country Data Summaries

A short summary of the results of the survey is produced for each of the MOs in each of the countries surveyed where sufficient survey data exists. Country data summaries (CDS) include a short analysis of micro-indicators rated by MOPAN members, direct partners and other survey respondents at the country level.

Country Data Summaries are prepared in order to provide feedback to those who participated in the MOPAN assessment and to provide input for a dialogue process. These summaries highlight main strengths and areas for improvement as perceived by survey respondents in each country. The data summaries are based on the perceptions of a range of stakeholders depending on the multilateral organisation assessed (MOPAN donors, clients/direct partners, peer organisations, etc.). They also describe differences in ratings between the different countries in which an organisation was assessed.

¹⁵ Wholey, J.S., Hatry, H.P., Newcomer, K.E. Eds (2010) Handbook of Practical Program Evaluation (Third Edition), San Francisco, California: Jossey-Bass, p. 446-447.

There are, however, some limitations to the MOPAN assessment at the country level. One relates to achieving an adequate response rate from each of the respondent groups and another is the sometimes high level of “don’t know” responses on the survey questions, particularly from MOPAN donors. The Assessment Team together with MOPAN takes these limitations into account when deciding what Country Data Summaries to prepare, and which respondent groups to include in the analysis.

Country Data Summaries are not published and are shared only with individuals who attend the country workshop on the MOPAN assessment findings, which takes place in the first quarter of the year following the assessment.

8. Strengths and Limitations of the Common Approach

MOPAN continues to improve methodology based on the experience of each year of implementation. The following strengths and limitations should be considered when reading MOPAN reports.

Strengths

- The MOPAN Common Approach is based on the core elements of existing bilateral assessment tools. In the long term, the intent is to replace or reduce the need for other assessment approaches by bilateral donors.
- It seeks perceptual information from different perspectives: MOPAN donors (at headquarters and in-country), direct partners/clients of multilateral organisations, peer organisations, and other relevant stakeholders. This is in line with the commitments made by donors to the Paris Declaration on Aid Effectiveness, the Accra Agenda for Action, and the Busan High Level Forum regarding harmonisation, partner voice, and mutual accountability.
- It complements perceptual data with document review and interviews, thus using multiple sources of data. This should enhance the analysis, provide a basis for discussion of agency effectiveness, and increase the validity of the assessment through triangulation of data.
- The reports undergo a validation process, including multiple reviews by MOPAN members, and review by the multilateral organisation being assessed.
- MOPAN strives for consistency across its survey questions and document review for each of the multilateral organisations, while allowing for customisation to account for differences between types of multilateral organisations.

Limitations

MOPAN Framework

- The countries are selected based on established MOPAN criteria and comprise only a small proportion of each institution’s operations, thus limiting broader generalisations.
- The Common Approach indicators were designed for multilateral organisations that have operations in the field. For organisations that have limited field presence or that have regional structures in addition to headquarters and country operations, there have been some modifications made in the data collection method and there will be a need for greater nuance in the analysis of the data.

Data sources

- The MOPAN Common Approach asks MOPAN members and the organisations assessed to select the most appropriate individuals to complete the survey. While MOPAN sometimes discusses the selection with the organisation being assessed, it has no means of determining whether the most knowledgeable and qualified individuals are those that complete the survey.

- The document review component works within the confines of an organisation's disclosure policy. In some cases, low document review ratings may be due to unavailability of organisational documents that meet the MOPAN criteria (some of which require a sample of a type of document, such as country plans, or require certain aspects to be documented explicitly). When information is insufficient to make a rating, this is noted in the charts.

Data Collection Instruments

- Three issues potentially affect survey responses. First, the survey instrument is long and a fatigue factor may affect responses and rates of response. Second, respondents may not have the knowledge to respond to all the questions (e.g., survey questions referring to internal operations of the organisation, such as financial accountability and delegation of decision-making, seem difficult for many respondents, who frequently answer 'don't know.'). Third, a large number of 'don't know' responses may imply that respondents did not understand certain questions.
- The rating choices provided in the MOPAN survey may not be used consistently by all respondents, especially across the many cultures involved in the MOPAN assessment. One potential limitation is 'central tendency bias' (i.e., a tendency in respondents to avoid extremes on a scale). Cultural differences may also contribute to this bias as respondents in some cultures may be unwilling to criticise or too eager to praise.
- Because one of MOPAN's intentions is to merge previously existing assessment tools into one, and to forestall the development of others, the survey instrument remains quite long.

Data Analysis

- While the document review can serve to evaluate the contents of a document, it cannot assess the extent to which the spirit of that document has been implemented within the organisation (unless implementation is documented elsewhere).
- Mean scores are used in the MOPAN reports to provide central tendency values of the survey results. The mean has the advantage of being the most commonly understood measure of central tendency, however, there is a disadvantage in using the mean because of its sensitivity to extreme scores (outliers), particularly when population samples are small. The assessment team reviewed the median and standard deviations in analysing the survey results. Volume II, Appendix V provides the standard deviations for each survey question.

Basis for Judgment

- Although MOPAN uses recognised standards and criteria for what constitutes good practice for a multilateral organisation, such criteria do not exist for all MOPAN indicators. As a result, many of the criteria used in reviewing document content were developed by MOPAN in the course of the assessment process. The criteria are a work in progress and should not be considered definitive standards.
- The Common Approach assessment produces numerical scores or ratings that appear to have a high degree of precision, yet can only provide general indications of how an organisation is doing and a basis for discussion among MOPAN members, the multilateral organisation, and other stakeholders, including direct partners.

Despite some limitations, the Assessment Team believes that the MOPAN reports generally provide a reasonable picture of systems associated with the organisational effectiveness of multilateral organisations.

Appendix II MOPAN Common Approach Survey for UNAIDS 2012

Note: This is the survey used to assess UNAIDS in 2012. It contains all of the possible questions, but not all questions were asked of all respondent groups.

[Introduction]

Welcome to the Survey for the MOPAN Common Approach in 2012 and thank you for agreeing to participate.

In responding to the survey, feel free to base your answers on your perceptions and knowledge of the Joint United Nations Programme on HIV/AIDS (UNAIDS). Your perceptions may be shaped by your experience with and exposure to UNAIDS.

Please be assured that your answers will remain confidential. Any comments you make will not be attributable to you, or be used in a way which might identify you or your organisation as the author of these comments. Findings will be reported in aggregate form only.

The survey should take approximately 45 minutes to complete. Note, however, that it may take longer depending on the answers you give.

Please note: It would be ideal if you would complete the survey in one session; however, if you would like to continue the survey later, you can do this at any point by closing the internet browser that displays the survey (i.e. this window). When you would like to continue, you can return to the point that you left off by clicking on the original link to the survey included in the email you received from us.

If at any point you have questions about this survey, please contact mopan2012@epinion.dk. You can move back and forth in the questionnaire at any point if you would like to change a response or a comment.

Your time spent contributing to the Common Approach is very much appreciated.

You have been identified to assess the organisational practices, systems and behaviours of the Joint United Nations Programme on HIV/AIDS (UNAIDS). However, before answering the questionnaire we would like to know how familiar you are with UNAIDS and the way it works. Please use the scale below to indicate your degree of familiarity, where 5 is "Very familiar" and 1 is "Not at all familiar".

- 1. Not at all familiar
- 2.
- 3.
- 4.
- 5. Very familiar

[Condition 2= 1]

You have indicated that you are not at all familiar with this organisation. This means that you will be screened out of the survey. Please hit 'Back' to modify your answer, or hit 'Next' to exit the survey.

Which of the following best describes how often you, in your professional role, have contact with UNAIDS?

- 1. Daily
- 2. Weekly
- 3. Monthly
- 4. A few times per year or less
- 5. Never

[Condition 4= 5]

You indicated that you never have contact with this organisation. This means that you will be screened out of the survey. Please hit 'Back' to modify your answer, or hit 'Next' to exit the survey.

Thank you very much for taking the time to fill out this survey. On the basis of the answers you have provided, we understand that you are not sufficiently familiar with the organisation to respond to further questions. We will therefore not ask you to complete the rest of the survey. The types of questions asked require a certain level of familiarity with UNAIDS. Please contact mopan2012@epinion.dk if you think you have been screened out of the survey by mistake.

[Overall Performance]

Overall Performance

We would like to ask you a few questions about the effectiveness of UNAIDS, its strengths and its areas for improvement. Unless otherwise specified, UNAIDS refers to the Joint United Nations Programme on HIV/AIDS and thus refers to all the Co-sponsors and the Secretariat. Only certain questions refer specifically to UNAIDS' Secretariat.

[6 - single]

Thinking about UNAIDS, and the way it operates, what do you consider to be its greatest strength?

[Q7]

[8 - single]

How would you rate the overall organisational effectiveness of UNAIDS?

Please use the scale below, where 6 means "Very effective" and 1 means "Not effective at all".

- 1. Not effective at all
- 2.
- 3.
- 4.
- 5.
- 6. Very effective
- 7. Don't Know

DEFINITION:

Organisational effectiveness = Being organised to support direct partners to produce and deliver expected development results.

We would like to ask you some questions about specific aspects of UNAIDS' performance. In thinking about these questions, please consider everything that you know about UNAIDS.

[Performance Areas]

Performance areas

You will see a series of statements that describe the practices, systems or behaviours in any multilateral organisation. Please rate how you think UNAIDS performs in those areas. Unless otherwise specified, UNAIDS refers to the Joint United Nations Programme on HIV/AIDS and thus refers to all the Co-sponsors and the Secretariat. Only certain questions refer specifically to UNAIDS' Secretariat. You will see a six-point scale as described below. The scale will stay the same for all statements.

DEFINITION OF THE SCALE USED IN THE QUESTIONNAIRE:

1 - Very weak = UNAIDS does not have this practice, behaviour or system in place and this is a source of concern.

2 - Weak = UNAIDS has this practice, behaviour or system, but there are important deficiencies.

3 - Inadequate = UNAIDS' practice, behaviour or system in this area has deficiencies that make it less than acceptable.

4 - Adequate = UNAIDS' practice, behaviour or system is acceptable in this area.

5 - Strong = UNAIDS' practice, behaviour or system is more than acceptable yet without being "best practice" in this area.

6 - Very strong = UNAIDS' practice, behaviour or system is "best practice" in this area.

At the end of each section, you will have the opportunity to make comments on any of the statements.

The statements are divided into four areas: Strategic Management, Operational Management, Relationship Management, Knowledge Management.

[Strategic Management]

Strategic Management

First of all, we would like to ask you about Strategic Management.

[Condition 1= 1 OR 1= 2 OR 1= 3]

[Corporate Governance]

Providing Direction for Results

To start with, we would like to ask you some questions related to UNAIDS' Secretariat's ability to provide direction for results.

According to what you know, how do you think UNAIDS' Secretariat performs in relation to the practices, systems or behaviours described in the following statements?

[9 - single]

UNAIDS' Secretariat's institutional culture reinforces a focus on results.

- 1. Very weak
- 2. Weak
- 3. Inadequate
- 4. Adequate
- 5. Strong
- 6. Very strong

[Condition 1= 1]

[11 - single]

UNAIDS' Secretariat's senior management shows leadership on results management.

- 1. Very weak
- 2. Weak
- 3. Inadequate
- 4. Adequate
- 5. Strong
- 6. Very strong
- 7. Don't Know

[12 - single]

UNAIDS' Secretariat makes key documents readily accessible to the public.

- 1. Very weak
- 2. Weak
- 3. Inadequate
- 4. Adequate
- 5. Strong
- 6. Very strong
- 7. Don't Know

DEFINITIONS:

[DEFINITION 1]

Partner-focused = Emphasis on the organisations that receive a direct transfer of finances or technical assistance from a multilateral organisation - such as national government departments, civil society organisations and private entities.

[Condition 1= 1]

[DEFINITION 2]

Results management = Management for results, or results-based management (RBM). That is, managing and implementing aid in a way that focuses on the desired results and uses information on performance to improve decision-making.

[DEFINITION 3]

Key documents = Documents that describe strategies, policies, key financial information, and other types of reports at organisation-wide, country, and/or project/programme level.

[Condition 1= 1 OR 1= 2 OR 1= 3]

[13 - single]

Do you have any additional comments on UNAIDS' Secretariat's institutional culture and values in providing direction for results?

- 1. Yes, please note:
- 2. No

[Condition 1= 1]

[Corporate Strategy1]

Corporate Strategy

Still thinking about Strategic Management, but now about corporate strategies, how do you think UNAIDS performs in relation to the practices, systems or behaviours described in each of the following statements?

[14 - single]

UNAIDS has a clear mandate.

[22 - single]

UNAIDS' results framework includes measurable indicators at output and outcome levels.

- 1. Very weak
- 2. Weak
- 3. Inadequate
- 4. Adequate
- 5. Strong
- 6. Very strong
- 7. Don't Know

DEFINITIONS:

Strategic plan(s) = High level document(s) that guide and direct the operations of the multilateral organisation.

Results management = A description (in tabular, chart or narrative form) of management (in-house/business focused) results, including indicators, that are expected to be achieved from the multilateral organisation's activities.

Development results = A description (in tabular, chart or narrative form) of development, beneficiary/stakeholder focused results, including indicators, that are expected to be achieved from the multilateral organisation's activities.

Causal links = A fundamental principle of results based management (RBM) / managing for development results (MfDR) is that results statements must be articulated in a framework or results chain, with clear causal linkages between each level of results. This linkage is a performance relationship between the results statements.

Do you have any additional comments on UNAIDS' corporate strategy?

- 1. Yes, please note:
- 2. No

[Condition 1= 2 OR 1= 3 OR 1= 4]

[Strategies-Country,Regional]

Strategies - Country, Regional, Thematic

We would like to ask you about strategies at the country, sector and thematic levels. Thinking now about UNAIDS' strategies, how do you think UNAIDS performs in relation to the practices, systems or behaviours described in each of the following statements?

[27 - single]

UNAIDS links results from project, sector and country levels.

(SEE DEFINITION BELOW)

- 1. Very weak
- 2. Weak
- 3. Inadequate
- 4. Adequate
- 5. Strong
- 6. Very strong

[31 - single]

UNAIDS includes results related to cross-cutting priorities, such as gender and human rights.

- 1. Very weak
- 2. Weak
- 3. Inadequate
- 4. Adequate
- 5. Strong
- 6. Very strong
- 7. Don't Know

DEFINITIONS:

Country level = This question may refer to an organisation's country strategy.

National HIV strategies = National plans or strategies that set out the country's development priorities related to HIV and AIDS.

Co-sponsors = One of the ten UN organisations who, together with the Secretariat, form UNAIDS.

Partners = Organisations that receive a direct transfer from UNAIDS or have direct interaction with them at the country level. Transfers include financial assistance, capacity building, policy advice, etc. Direct partners can be governmental (ministries, departments, agencies, etc.), non-governmental (associations, non-profits, co-operatives, institutes, etc.) or private sector corporations.

[Condition 1= 2 OR 1= 3 OR 1= 4]

Appendix V KPI and MI Data by Quadrant

Mean Score: calculation of mean scores includes the application of weighting factors to the respondent sample as follows:

- a) equal weight is given to the views of each of the five respondent groups;
- b) equal weight is given to each of the countries where the survey took place;
- c) equal weight is given to respondent groups within each country where the survey took place

However, the base is un-weighted.¹⁶ Total – includes all respondents. “--” indicates that the question was not asked among a particular respondent group

Strong (4.5-5.49)
Adequate (3.5-4.49)
