UNAIDS

UNAIDS collects, curates and disseminates the most extensive data and analysis on HIV epidemiology, programming and funding

INFORMS BETTER DECISIONS TO CLOSE GAPS, ADDRESS BARRIERS AND BOTTLENECKS
GLOBAL MONITORING AND REPORTING

- Three Pillar Reports: Global AIDS Update, UNAIDS Data Book, World AIDS Day report
- Provides solid base for strategic planning and target setting
- AIDSInfo dashboards on the HIV epidemic and response, inequalities, key population, finance, laws and policies, and subnational data
- Updated HIV estimates in 172 countries in 2022
- Supports reporting against new Global AIDS Monitoring indicators

IMPROVES KNOWLEDGE ON THE AIDS PANDEMIC AND NEEDS THROUGH GRANULAR DATA
EPIDEMIOLOGICAL ANALYSIS

- Supports countries in strengthening their epidemiological surveillance systems to track the spread and impact of HIV
- In 39 countries set new models among adolescent girls and young women in high risk identified districts
- Analysis of vertical HIV transmission through the *"stacked bar"* tool improves reduction of HIV infections among pregnant women living with HIV
- New data and analyses, such as key population size estimates, HIV service cascades and subnational inequalities

BRINGS TO LIGHT HIV-RELATED INEQUALITIES

ANTIRETROVIRAL TREATMENT SHOWS INEQUALITIES COVERAGE BETWEEN POPULATION GROUPS

INEQUALITY DASHBOARD ADDRESSING KEY GAPS IN THE HIV RESPONSE

IMPROVES CAPACITY AND ENSURES QUALITY OF COMMUNITY-LED MONITORING
ADVOCACY AND CAPACITY-BUILDING

- In 75 countries, communities' capacities strengthened including for planning, data-collection, advocacy and programme management
- Facilitates and provides technical support and shared learning for quality assured community-led monitoring implementation, to improve service provision and address bottlenecks

**IMPROVES EQUITABLE HIV FINANCING**
DATA-DRIVEN RESOURCE ALLOCATION

- Used evidence for impactful programmes and investments by countries and partners, especially in 79 countries for evidence-informed HIV Global Fund grants
- Tracking and analysis of domestic and international resources through the Global AIDS Monitoring data from 145 countries
- National AIDS Spending Assessments in 16 countries inform HIV resources analysis, and improvement in value for money and sustainability
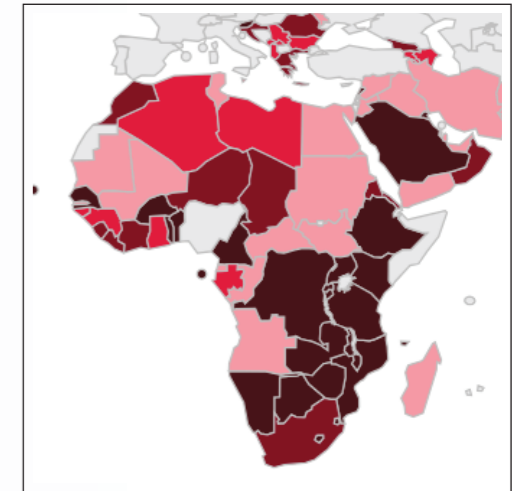

Key population

Total population

Percent of people living with HIV who are on ART by characteristic (PHIA)
